### **EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

1. This action is responsive to the amendment filed February 9, 2005.

#### ***Response to Amendments***

2. Per Applicants' request, claims 1, 3-5, 7, 9-11, 13 and 15-17 have been amended. Claims 1, 3-7, 9-13 and 15-18 remain pending.
3. The rejections of claims 13 and 15-18 under 35 U.S.C. § 112, second paragraph and 101 are withdrawn in view of Applicants' amendments to these claims to clearly point out and distinctly claim the subject matter and to direct the subject matter to a single statutory class of invention.

#### ***Response to Arguments***

4. Applicant's arguments, see Remarks/Arguments, pp. 9-12, filed February 9, 2005, with respect to claims 1, 3-7, 9-13 and 15-18 have been fully considered and are persuasive. The rejection of these claims under 35 U.S.C. § 103(a) as being unpatentable over U.S. Patent No. 6,205,476 to Hayes in view of U.S. Patent No. 5,894,515 to Hsu has been withdrawn.

#### ***Examiner's Statement of Reason for Allowance***

5. Claims 1, 3-7, 9-13 and 15-18 are allowed.
6. The following is an examiner's statement of reason(s) for allowance:

The examiner agrees with Applicants that the prior art of record, taken individually or in combination, fail to teach or suggest the following steps when they are considered in combination with the remaining steps recited in amended independent claims 1, 7 and 13:

*encrypting and storing, by the remote code, the user configuration in a manifest file;*

*performing a first authentication, by the remote code, of the particular user in response to the particular user requesting the application program;*

*performing, by the local code, a local logon to perform a second authentication of the particular user;*

*decrypting, by the local code, the manifest file to produce a decrypted user configuration in response to the second authentication; and*

*responsive to the second authentication, downloading, by the local code, data from the remote data processing system to the local data processing system according to the decrypted user configuration.*

As correctly noted by Applicants, Hayes teaches instead a method for allowing users to roam and log in from any computer in a system and have it configured automatically at runtime according to preferences stored for the user at the server, and Hsu teaches instead general encryption.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
